

Renewable Energy Buyback Scheme (REBS) Change of System Application

Electricity Industry (Licence Conditions) Regulations 2005

If you are an existing REBS customer and wish to modify your small renewable energy system for the purposes of the Renewable Buyback Scheme please complete this application.

All fields must be completed. All incomplete applications will be returned for completion.

Renewable Energy Buyback Scheme

Personal Details

Customer Surname (Account Holder)	Given Name(s)
Account Number	Meter Number
Address	
Email	Contact Telephone Number

System Details

System Type (Solar, Wind or Hydro)

Before modification:

After modification:

Total Generation System Size (kW)

Before modification:

After modification:

Total Inverter Capacity (kW) (Not to exceed 5kW)

Before modification:

After modification

Declaration

- The information I have provided in the form is true and correct.
- The changes to the small renewable energy system comply with Western Power's Technical Rules.
- If I have changed my inverter capacity for the small renewable energy system, it has been approved by Western Power and connected to Western Power's electricity network.
- Synergy's Renewable Energy Buyback Scheme terms and conditions apply to the system expansion and I agree to be bound by these terms and conditions.
- I authorise Synergy (if required by Synergy) to verify system changes with state and/or federal government agencies and entities.
- If I do not own the system, I have the system owner's consent to modify the system.
- The net feed in tariff subsidy currently applies to a small renewable energy system installed at the premises specified on this application.
 Yes No
- That, if I am a net feed in tariff customer, I will no longer be eligible for the net feed in tariff subsidy if I increase the inverter capacity above what has previously been approved by Synergy prior to the subsidy scheme suspension. (Refer REBS terms and conditions for details: synergy.net.au/rebs)
