\*If the metering installation has a Current Transformer (CT) (often found in large commercial premises), then the property owner will need to obtain a quotation for removal of the CT meter direct from the Network Operator, Western Power. This information can be obtained from their website at [www.westernpower.com.au](http://www.westernpower.com.au) or by phone on 13 10 87.

CT meters are used when the total load of the premise is greater than 100 amps, as a directly fitted meter is unable to measure consumption accurately.
