

Lifesavers

Workplace safety principles that will save your life

1

I always work under a permit when a permit is required

2

I am competent and authorised prior to operating plant or equipment

3

I always assess the risk and obtain authorisation before removing or disabling a primary safety protection device

4

I always check the load and position myself in the safe zone when working near suspended loads

5

I always utilise fall prevention or fall protection where there is an unprotected edge or a risk of falling from height

6

I always protect myself and my team mates when there is a potential for objects falling from height

7

I am competent and authorised to enter a confined space or work relating to a confined space

8

I am always fit for work and conscious of my team mates' health and wellbeing

9

I always follow safe work practices and procedures and support my team mates to do the same
