Muja volunteers inject new life into Collie PCYC

Team members of Muja Power Station's volunteer program have hit the tools to give Collie's PCYC a much-needed facelift.

The refreshed look for 2020 saw doors and walls throughout the building repaired and painted and repaired, in addition to the team giving the centre's 'ninja gym' an upgrade.

The PCYC provides a range of recreational activities and specialised support programs for young people in Collie and its surrounding communities and Synergy Acting Turbine Group Manager Rob Dupree said the experience for the team was highly rewarding, providing a unique opportunity for team building.

"Everyone really embraced the task at hand and, despite the 40-degree day making working conditions tough, enthusiasm did not wane," he said.

As the Muja volunteer program progresses we look forward to being able to provide hands-on support to Collie like this more regularly."

The event was an all-day affair and the Synergy volunteers also learned about the centre's services and how they benefit young people in the region.

Reflective of Synergy's ongoing commitment to the Collie community, several more volunteer events are being planned for the rest of the year.

About Synergy

As Western Australia's leading energy generator and retailer, Synergy is an essential and trusted provider of electricity and gas. Utilising our diverse energy generation portfolio, Synergy supplies reliable and affordable energy to more than one million residential and business customers.

Synergy owns and operates electricity generating assets, including thermal power stations, spanning from Kalbarri in the north, out to Kalgoorlie in the east and down to Albany in the south – an electricity network known as the South West Interconnected System (SWIS).

Owned by the Government of Western Australia, Synergy proudly supports the people of Western Australia and plays an active role in the communities in which we operate. Synergy's purpose is clear – to lead Western Australians to their intelligent energy future. For more information visit www.synergy.net.au.
